

ONLINE-TRAINING (by MS Teams)

Practical Introduction to the SL Database and SL Software Modules

The course provides an understanding of the practical workflow and the efficient use of the SL software modules in the respective work steps, ranging from the compilation of the spectroscopic data for modeling to the safe use of the finished methods in routine measurement operations.

Basic knowledge of instrumental analysis is required. Theoretical knowledge of chemometric spectroscopy makes it easier to understand the course content, but is not a prerequisite for participation.

The training will be carried out in English.

Content:

1. Chemometric spectroscopy and workflow-oriented use of SL software products
2. Raw data make all the difference: practical know-how for measurement setup and sampling
3. Presentation of the CPF database (CPF: Chemometric Project File)
4. Data preparation and processing with SL Data Manager
 - Import (JCAMP, SPC, ISI, Excel) and related export
 - Assigning reference values
 - Evaluation of the data according to quality criteria
 - Creation of the spectra series for further use in the SL Calibration Wizard
5. Creation of quantitative calibration models with the SL Calibration Wizard
6. Configuration and practical use of finished applications with SL Predictor or Offline Prediction (SL Utilities)
7. Open questions, more practical exercises and discussions as required by participants

Interested?

We would be glad to receive your completed registration form (page 2) at this e-mail address: info@sensologic.com.

After the training, your successful participation will be confirmed by a certificate.

**I am taking part in the ONLINE-TRAINING (by MS Teams)
Practical introduction to the SL database and SL software modules
09. / 10. November 2021 (10 h incl. 2 blocks à 5 h)
EUR 850 per participant plus VAT (if applicable)**

The maximum number of participants in this online training course is limited to 10.

Participant:

Last Name, First Name, Title
Company / Organization:
Street
Postal Code, Location
Phone:
Fax:
E-Mail:

Invoice recipient (please complete if different from the participant information)

Company / Organization:
Department:
Street:
Postal Code, Location
Phone
Fax:
E-Mail:
Signature:

Conditions of participation:

The participation fee includes training material (pdf and sample data that will be made available prior to training).
We will confirm receipt of your registration immediately. At the end of the training, you will receive an invoice that is due for payment immediately upon receipt.
We recommend using a Windows computer with microphone and loudspeaker, preferably a headset.

Cancellation conditions:

Cancellation free of charge is possible up to 2 days before the start of the training. In the event of later cancellations, we reserve the right to charge you up to 80% of the training costs.

Registration confirmation by SensoLogic GmbH:
